# Executive Summary & 5-Branch Master Table

## 01 Project Overview & Executive Summary

Sooraj Badminton Academy (SBA) operates five premier training facilities across Greater Kochi. To establish local Google Maps presence and capture high-intent searches (e.g. *"badminton coaching near me"* or *"badminton classes in Kadavanthra"*), dedicated Google Business Profiles were created for each physical arena. All listings feature verified contact hotlines, standardized business naming, official operating hours, and direct links to hyper-local website landing pages.

> ⚠️ **CURRENT SITUATION & PUBLIC VISIBILITY CLARIFICATION**
>
> **All five SBA branch Google Business Profiles have been successfully created. The remaining step is Google's verification process, which requires live video verification for the applicable profiles. Until verification is completed and approved, some profiles may not appear publicly on Google Search or Google Maps. Public visibility should be checked again after verification approval.**
>
> *Note: The profiles are active in the Google Business dashboard awaiting verification; they are NOT permanently unavailable, rejected, suspended, or deleted.*

**✓ SINGLE SOURCE OF TRUTH VERIFICATION**

All 5 branch entities have been synchronized across the PostgreSQL `centres` database, Schema.org `SportsActivityLocation` JSON-LD definitions, and XML sitemaps. Legacy references to deprecated locations have been completely eradicated, ensuring zero data conflicts when Google cross-checks business listings against the web domain.

## 04 How GBP SEO Powers Post-Verification Discovery

**1. Strict NAP Alignment**
100% data consistency between Google Business Profile, Schema JSON-LD, and website footer builds high local trust.

**2. Micro-Market Landing**
Directing GBP traffic to dedicated `/[location]` URLs prevents keyword cannibalization across Kochi centers.

**3. Schema Entity Sync**
Parent `SportsOrganization` links child `SportsActivityLocation` entities, multiplying domain authority.

# Live Video Verification, Next Steps & Conclusion

## 05 Live Video Verification Protocol

Google enforces live video recording verification for athletic academies to validate physical authenticity. When recording on-site at each facility, ensure the video is captured in **one continuous, unedited take** covering:

**A. Street & Exterior**
Capture street name signs, nearby landmarks, and academy building entrance with outdoor signage.

**B. Courts & Equipment**
Walk onto the active courts, showing BWF synthetic mats, lighting fixtures, nets, and coaching gear.

**C. Management Proof**
Film staff unlocking doors, accessing the reception counter, storage lockers, or branded materials.

## 06 Actionable Next Steps (9-Point Execution Plan)

1. **Complete Live Video Verification**
   Coordinate with facility staff at Kadavanthra, Kumbalanghi, Maradu, Palluruthy, and Chullikal to record and submit the required video.
2. **Submit Verification in Google Business Profile Dashboard**
   Confirm that each recording uploads completely without timeout and verify the submission status badge.
3. **Monitor Google's Review Window**
   Allow 24 to 72 hours for Google's automated systems and manual reviewers to validate the video uploads.
4. **Confirm Public Visibility on Search & Maps**
   Conduct external test queries to verify that all 5 location pins appear publicly on Google Maps and desktop search results.
5. **Verify Published Listing Information Accuracy**
   Audit published phone numbers (+91 79076 55513), landing page URLs, operating hours, and business categories.
6. **Audit Local SEO & Keyword Performance**
   Confirm that primary keywords (e.g. *"badminton academy in Kadavanthra"*) trigger Local 3-Pack appearances.
7. **Upload High-Resolution Facility Photos & Announcements**
   Publish authentic arena interior shots, coach action photos, and admissions announcement posts on each profile.
8. **Generate Google Review Short-Links & Reception QR Codes**
   Create direct review links (`https://g.page/r/.../review`) and print display QR codes for parent reviews at court reception desks.
9. **Perform Final Multi-Device Local Visibility Audit**
   Conduct cross-device verification from multiple mobile and desktop IPs across Kochi to benchmark initial rank.
